

Spring Plungers • with moveable ball and slot
22051.0216

Product Description

Spring plungers can be used for locating or for applying pressure, as a detent or for ejection. The running of the ball minimises wear on the counterpart, this also results in a positive locking behaviour depending on the counterpart. Another advantage of the plastic ball is the electric insulation.

Material

- Body**
- Free cutting steel, blackened
- Bearing**
- plastic
- Ball**
- Ball-bearing steel, hardened
- Spring**
- Stainless steel

Characteristic

Heavy spring load: marked with two lines

More information

Notes

Special types on request.
Spring plungers are specially tested for spring range and forces.
