# **Centering Clamping Elements** • with clamping balls, operation from the bottom 23340.0354

## **Product Description**

To be used for accurate centering and clamping in blind holes of workpieces with locating hole. Exact self-centering with a precision of  $\pm 0,025$  mm. The clamping balls frictionally center and hold workpieces with raw or pre-machined surfaces down to the bearing points. Large adjustment stroke and a small building height are a feature of this center clamping element. **Mounting from either top or bottom**.

## Material

Body

· Tool steel, hardened, blackened

## Spring

Stainless steel

- Clamping balls
- Stainless steel 1.4112, hardened and ground

## Assembly

Assembly instruction for mounting from above: Remove clamping plate and screw. Screw in threaded pin from below, and tighten from above using female  $WS_2$ . Further or detailed information can be found in the assembly and operating instructions.

## Operation

Operation from bottom manually or automatically with either pneumatic or hydraulic actuation.
