# Threaded Lifting Pins · self-locking - INCH

2B352.1012

## **Product Description**

Heavy-duty lifting element for quick and easy use, with moveable shackle and locking stud to provide protection against unintentional unlocking. For lifting loads, the threaded lifting pin is inserted into a threaded hole. In contrast to a ringbolt, time-consuming screwing in and out is therefore unnecessary.

All versions are corrosion-protected. The version made of stainless steel is also resistant to corrosion and weathering, so it is also suitable for external use. In addition, the high-strength, precipitation-hardened pin makes extreme loads possible.

#### Material

# Pin part

· Stainless steel 1.4542, precipitationhardened

#### **Press button**

Aluminium, orange, anodised

#### Threaded element

· Stainless steel 1.4542, precipitationhardened

#### Shackle

Stainless steel 1.4571

#### Spring

Stainless Steel

#### **Assembly**

Threaded lifting pins can be mounted into a thread that is true to gauge.

## Mounting:

- 1. Press in the button and hold it down.
- 2. Insert the threaded lifting pin.
- 3. Release the button (The button must be back in its original position.).
- 4. Tighten the threaded lifting pin by hand, until it bears compleately on the bearing surface.
- 5. It must be ensured that the threaded segments are engaged in the mounting thread.

## Dismantling:

- 1. Unscrew the threaded lifting pin approx. a quarter of a turn anticlockwise.
- 2. Press in the button and hold it down.
- 3. Remove the threaded lifting pin.
- 4. Release the button.

#### Operation

Each threaded lifting pin contains an instruction manual with an EC Declaration of Conformity.

#### More information

## **Notes**

· This product is manufactured in INCH dimensions.
